

Mission

To create a partnership with each client, utilizing their strengths and unique needs, while providing a safe and secure working and living environment.

Employees

When adding to our team, our company is cautious and selective. We select energetic and diligent security professionals who are passionate about excellence and customer satisfaction. We offer our employees competitive wages and incentives that foster a highly motivated working environment. Security First promotes a learning environment through our own training program that provides updated specialized continuous training in bioterrorism, safety in the workplace and loss prevention. We provide our employees with opportunities to excel and grow in a work environment that values diversity, employee participation, and individuality.

Goals

Provide outstanding services with competitive pricing

Provide specialized security plans to meet each client's needs

Work as a partnership with our clients

Use technology to maximize security services

Provide the highest quality armed and unarmed security officers, executive and personal protection, and patrol services throughout San Diego County

Security First

**"When you think Security,
Think Security First"**

Security first prides itself in working directly with each client in a partnership to establish a personalized security plan that promotes a safe and secure working and living environment. We are cognizant of each client's unique needs and customize a specialized security plan that is tailored to precisely fit those needs. We provide services to a wide variety of clients, ranging from casinos and supermarkets, to large condominium complexes and shopping centers.

Security first provides the highest quality security officers who are licensed, bonded, and insured. Our services include:

Personal Liaison

Our commitment in establishing a partnership with each client is maintained through an assigned personal liaison. Personal liaisons work directly with each client to ensure the maximum security benefits of our services. Biweekly visits to each client are conducted to address potential changes or concerns that may arise. Personal liaisons also conduct random visits to our various sites to ensure the quality of our services.

Supervisors

Our quality trained supervisors make themselves visible to all staff by conducting daily site visits. Supervisors are available 24/7 and conduct their monitoring by roving patrol. Each supervisor ensures that every security officer is aware of their post instructions and is capable of conducting services to fulfill each client's needs. All supervisors are trained in executive protection, loss prevention and bioterrorism.

Uniformed and Plainclothed Services

Our Uniformed officers are trained to convey a conspicuous presence to deter disruption while protecting personal or corporate assets. We train our officers to be constantly alert to suspicious activity and report details about any situation

which warrants monitoring. Plainclothed officers provide discrete surveillance to sites that wish to continue business as usual. These officers are trained to blend in as employees, patrons, or people just passing by.

Mobile Patrol Services

Consists of random or scheduled security checks conducted by an officer in a marked vehicle. Our vehicles have state of the art communication and security equipment to better serve your needs. This service deters suspicious or illegal activity by establishing a highly visible security presence day or night.

Special Operations and Events

Implements security services to a variety of private and public functions such as conferences, conventions, meetings, community events, grand openings, carnivals, church and political events and others as needed. A custom security plan is created by the personal liaison to assure maximum security and safety for each event.

Executive Protection

A personalized security service that provides one on one security protection for high profile clients and their families to ensure that they conduct their daily lives without unwelcome intrusion or potential threat to their safety. Our agents are able to blend into any type of environment or setting without being intrusive.
